

## HOW TO APPLY GLUE-ON TOE NAILS

### Pre-Painted Glue-On Toenails (codes 11200 and 11300)

- Achieve an instant salon quality pedicure with pre-decorated, pre-shaped toenails from Manicare – just glue and go! The Glue-On Toenails have been selected on the best-selling Glue-On French manicure nail designs – Natural French and French Beige. Each kit contains 22 toenails in 11 assorted sizes; nail glue drops 2g and a cuticle stick. The pre-painted, pre-shaped toenails never chip, are simple to apply – perfect for extended wear (last for up to 2 weeks).

### USAGE:

#### Step 1 – Prepare Your Nails

- Remove any polish or oils from natural toenails with Manicare's Super Fast Nail Polish Remover, ensuring your nails are clean and dry.

#### Step 2 – Selecting the Nails

- Select appropriate sized nails to suit natural nails (ie. which best correspond the width of your natural toenails).
- The sides of each nail should be in line with sides of your natural nail.

#### Step 3 – Applying the Nails

- Apply one drop of glue to the back of artificial nail.
- Position nail up to cuticle and firmly press glue-on toenails onto natural nails for 20 seconds.
- Wipe any excess glue from skin before it dries using a paper towel/wipe.
- Use cuticle stick to remove any excess glue around toenails.
- Trim artificial toenails (using Manicare Nail Clippers) and file to desired shape and length (using Manicare Nail Shapers for Artificial Nails).

### BEAUTY TIP:

- Once nails are applied and have adhered well, apply Manicare Cuticle Oil and Manicare Spa Therapy Replenishing Foot Conditioner to restore moisture to your cuticles and feet.
- Apply matching Glue-On Nails to create the classic French polish for your hands.

### Removing Glue-On Nails:

- Soak nails in acetone based Manicare Nail Polish Remover, until soft.
- Gently lift glue-on nail off using a Cuticle Stick. Gently buff the natural nail to remove residue. Wash feet with warm soapy water and then apply Manicare Cuticle Oil to the cuticle area of each nail to help nourish and restore moisture.

#### CARE TIPS:

- Do not apply Glue-On Nails to infected or damaged nails.
- If nails begin to lift or loosen, remove immediately and apply a new nail.
- It is recommended nails are removed after 2 weeks of continuous wear. Wait one week before re-applying.

## SELF STICK NAILS

#### Pre-Painted Self-Stick Nails (codes 11655, 11755, 11855 and 11955)

- Pre-painted, pre-shaped and natural looking in assorted French manicure designs.
